- **Email:** devon.noeldetilly@gmail.com
- **Phone:** 647-539-3446

Experience

A sample of some cool projects I've worked on:

500px

- Chatops using Hubot
- Built an open source node.js task runner
- Built a golang service for managing user notifications
- Built client gems for interacting with internal golang services
- Built an internal sinatra ruby api for the 500px mobile apps
- Managed a large set of automated tests
- Managed deployment of a web app with millions of users

BESTECH

- Built an internal reporting web app
- Built an internal admin web app
- Built a PLC simulator
- Built localization into several legacy applications

Technology

A brief sampling of some of the technology I've worked with in production:

- **Languages:** ruby, golang, js/coffee, c#, vb
- **Frameworks:** rails, sinatra, node.js, backbone.js, .net
- **Testing:** rspec, factory_girl, mocha, chai, should.js, ginkgo, gomega
- **Package Managers:** rubygems, npm, apm, goop
- **Automation:** travis-ci, semaphoreci, capistrano, chef, hubot
